PROFILE

IT Automation and Integration specialist with hands-on experience building and maintaining n8n workflows, REST API and webhook integrations, and AI-assisted operational processes. I turn manual workflows into structured automations with validation, monitoring, troubleshooting and clear documentation. My background combines application development with CRM and contract operations, giving me a strong service mindset and experience coordinating sensitive, business-critical information with internal and external stakeholders.

CORE SKILLS

Automation & Integration	n8n, REST APIs, webhooks, JSON, event-driven workflows, authentication concepts, Strapi and SQL
Reliability & Support	Workflow testing, logs and API responses, error handling, monitoring, validation, troubleshooting and user support
Development	JavaScript ES6+, TypeScript, Node.js, PHP, Angular, React, Flutter, Git and GitHub
Operations & Documentation	CRM workflows, process mapping, technical documentation, data quality and stakeholder coordination

PROFESSIONAL EXPERIENCE

Full-Stack & Automation Developer | Accademia Italiana Fitness

Sep 2025 - Present | Rome, Italy

- Design and maintain n8n workflows for CRM processes, customer onboarding, notifications, cross-service data synchronisation and webhook/API integrations.
- Develop and support Angular applications and PHP/Node.js APIs connected to Strapi and SQL data, including user roles and business-process flows.
- Implement AI-assisted workflows for chatbot operations, request classification, dynamic routing and scoring, with validation and human review where required.
- Diagnose integration issues through workflow executions, logs and API responses; test changes, monitor outcomes and document operational behaviour.

CRM & Contract Operations Specialist | Team Service Soc. Cons. a r.l.

Apr 2024 - Jun 2025 | Rome, Italy

- Managed daily CRM-based operations in ARXivar and Archibus for contracts, deadlines, insurance records and structured document access.
- Configured approval paths, notifications and monitoring dashboards to improve data accuracy, traceability and timely operational follow-up.
- Supported users and coordinated with public-sector stakeholders, brokers and institutional clients while handling compliance-sensitive information.

SELECTED PROJECTS

Green Active Mobile App - Professional product published on iOS and Android

- Contributed to the mobile app renewal across onboarding, trainer management, workouts, progress tracking and Strapi backend integration.
- Built and validated related data flows and operational automations, with cross-platform troubleshooting on a live user-facing product.

Stack: Flutter, Strapi, REST APIs, SQL, n8n and AI-assisted workflows

iOS: [Apple App Store](#) | **Android:** [Google Play](#)

SIGNAL - AI Operational Intelligence

- Operational dashboard for analysing business events and signals, interpreting likely causes and presenting recommended actions.
- Architecture designed for n8n, webhooks and knowledge-base integrations, with event timelines and workflow monitoring interfaces.

Stack: React 19, TypeScript, Express, SQLite, REST APIs and AI workflows

Live demo: [Open](#) | **Source:** [GitHub](#)

Steam Circuit Padel Pro - 2-vs-2 browser arcade game

- Implemented diagonal serves, wall and net bounces, charged shots, aiming, slice controls and player switching.
- Added AI-controlled opponents and teammates, responsive controls and three arenas with distinct gameplay modifiers.

Stack: HTML5 Canvas, JavaScript ES6+, CSS, custom game physics and gameplay AI
